

NEWSLETTER

SUMMER 2006

1996 - 2006

Dear All,

Welcome to our 2006 newsletter.

In the hearing aid industry, I think 2006 will be remembered as "the year of the open ear". Following the success of the Resound Air range, all manufacturers have released their versions, all offering something different .

These systems offer excellent natural hearing without the feeling of being 'blocked up', they are also very cosmetic. (see over).

It seems every time I open a newspaper or magazine these days there's an advert for a Hearing Aid Company or new remarkable hearing aid. Some of the claims of these Companies do appear to be slightly far fetched, I'm waiting for the hearing aid that makes the tea for you!. There are some excellent new products available though, and I have access to all of them. If you see a product you are interested in, I would be happy to give my unbiased opinion and price. (Usually our prices are 30% less than the national Companies).

I hope this newsletter finds you well and I look forward to helping you in the future.

NEW ANNUAL CHECK UP SERVICE

Over the next couple of months we are going to introduce a new database system.

This will enable us to arrange automatic 6 & 12 monthly appointments to check and clean your hearing aids and examine the condition of your ears. This is a free service for County Hearing Aids clients.

If we haven't seen you for a while please contact us to arrange the first of your regular checks.

This improves the reliability and performance of your hearing aids and reduces expensive repairs.

If we have not seen you for 3 years we will also check your hearing levels to see if your aids need adjusting.

Batteries By Post

For the eleventh year running we are supplying batteries at only £3:00 for a pack of six.

You are welcome to call in to collect or you can phone and we will send you your batteries + 30p postage.

MICRO HEARING AIDS COME TO TOWN!

Since the launch of digital hearing aids in 1996 there have been many innovations and improvements. The most dramatic innovation in the last 18 months has been Micro hearing aids. They are not suitable for everyone, but all the leading manufacturers are producing their own versions, each one with unique features.

They all offer a very comfortable, cosmetic fitting with natural sound. Some models have directional microphones, others different program settings and remote controls. All these features mean you get better hearing, especially in noisy situations like groups, restaurants etc. Prices range from £995 to £1799.

WANT TO TRY BEFORE YOU BUY?

Because this type of hearing aid are "instant fit" I am able to demonstrate them in the office. If you think you might like them, you can even try them for a week with no obligation. (First come first serve)

One of the leading manufacturers, **Phonak**, have kindly agreed to send a specialist to demonstrate their products on **16th August 2006**. If you would like to come along, please let me know A.S.A.P. as I think it is going to prove to be a very popular day and spaces are limited. You are also welcome to come and see me anytime for more information and advice, just call Yvonne on 01277 264938.

There are around 20 different models from 6 manufacturers available. As always, our prices are the keenest in the area. Feel free to get quotes from other companies, I think you will be surprised!

REMEMBER

Just because we don't bombard you with special offers and junk mail we haven't forgotten you!. If you need assistance or advice please tell us and we will do all we can to help.

We are still offering the **full** range of products from **all** the leading manufacturers at the keenest prices.
